

Interventions from Clinical Trial Reports

Landscape of Interventions

Combinations involving cyclophosphamide

Data Collection Verification Form

The screenshot displays the 'Clinical Trial Literature Annotator' software interface. The window title is 'Clinical Trial Literature Annotator'. The interface is divided into several sections:

- Left Panel (Article Structure):** A tree view showing the structure of the article. The 'Results' section is expanded, and 'Design of a Neoadjuvant Glioblastoma' is selected.
- Central Panel (Article Text):** Displays the full text of the selected article section. The text describes a single-arm study of mTOR inhibitors in PTEN-null cancer models, focusing on antitumor activity and short-term endpoints. It details the study design, patient eligibility, and the use of rapamycin treatment.
- Right Panel (Metadata):** A form for entering metadata. It includes fields for 'Paper Title', 'Authors', 'Journal Title', 'MeSH Terms', and 'Additional Keywords'. The 'Paper Title' field contains 'Antitumor Activity of Rapamycin in a Phase I Trial for Patients with Recurrent PTEN-Deficient Glioblastoma'. The 'Authors' field lists 'Tim F Cloughesy', 'Koji Yoshimoto', 'Phioanh Nghiemphu', 'Kevin Brown', 'Julie Dang', and 'Shaojun Zhu'. The 'Journal Title' field contains 'PLOS Medicine'. The 'MeSH Terms' field is empty. The 'Additional Keywords' field contains 'PTEN loss' and 'Time-to-Progression'.

At the bottom of the window, there is a 'Find:' search bar and a 'Clear' button. Navigation buttons at the bottom right include '< Previous', 'Paper Information', and 'Next >'.
